

SAMPLE

Score: ____/11

Word Problems: Time

1-4. Carla is helping her mom bake a cake. They started at 9:00 AM on Sunday morning. While mom beat the eggs and sugar, Carla sifted the flour. Carla took 10 minutes but her mom beat the mixture for 15 minutes. Then together they added flour to the mixture and poured it into the baking dish. This took 11 minutes. They put the cake in the oven to bake for 55 minutes. (Carla had already turned the oven on as soon as she had finished sifting her flour.) Fill out the table below:

Activity	Start	Oven turned on	Baking starts	Cake ready
Time				

5. How long did the whole process of baking the cake take, from start to finish?

6-7. Jacob looks at his watch. The hour hand is between 9 and 10 and the minute hand is on 6. He has to finish his work in an hour and a half.

6. What is the time now? _____

7. When does he have to finish his work? _____

8. The school bus reaches the stop at 7:30 AM. It takes 11 minutes to reach the school. School starts 6 minutes after that. At what time does the school start?

9. School recess is 15 minutes long. Recess ends at 11:10 AM. At what time does the recess start?

Review:

10. Tina buys a sheet of stickers for 85¢. She pays for the stickers with four coins. What does she pay with?

11. What is more: $5D + 3N$ or $3D + 5N$? By how much?
