

SAMPLE

Score: \_\_\_\_/12

**Time Problems**

1. Norma worked on her science project for 2 hours 20 minutes on Monday, 1 hour 45 minutes on Tuesday, and 35 minutes on Thursday. How much time did she spend on the project?

**2-3. Jacob takes 12 minutes to plant a tomato plant. He needs to plant 8 of them.**

2. How long will it take him to plant the tomato plants?

3. If Jacob begins planting at 8:25 AM, at what time will he finish planting?

**4-5. It takes Stan 22 minutes to complete 1 page of homework.**

4. If he needs to finish 7 pages of homework, how long will it take him?

5. Stan completed his homework at 8:15 PM. When did he begin his homework?

6. A mason takes 1 min 30 seconds to fix a slab. How long will he take to fix a dozen slabs?

**7-9. A train starts at 12:05 PM. It goes 80 mph.**

7. City A is 120 miles away. How long does it take to cover that distance?

8. At what time does the train reach city A?

9. City B is 360 miles away from city A. How long does the train take to cover that distance?

**Other Problems - Round to the nearest hundred and then add or subtract.**

10.  $81,235 - 76,385 = \underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

11.  $65,457 + 8,734 = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

12.  $49,726 + 28,655 = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$
